Newsletter of the International Cosmoethical Conscientiological Community

## Symposium interfaces with university

Adriana Rocha Cosmoethos

On October 4th, 5th and 6th, 2019, at the Hotel Mabu Interludium, the 1st International Symposium on Cosmoethology was held, bringing the theme Cosmoethics and Democracy, with in-class and online presence of 61 people from several Brazilian states, besides Foz Iguaçu and Europe. Hegrison Alves, Cosmoethos general coordinator, opened the event by talking about the interrelationships of cosmoethics and democracy. The event fulfilled the statutory objective of encouraging the interface with society, dialogue among the various specialties of conventional science and conscientiology, and between the conscientiological specialties, by promoting the coming of professors from USP / Mackenzie, specializing in political process, democracy and corruption to be part of the 21st Century Democracy Debate.

This first Symposium marked the conscientiological agenda with activities of the Cosmoethology specialty, of national and international scope, plus the launch of two conscientiological works: COSMOETHOS: Journal of Cosmoethology, biennial scientific publication of the International Association of Cosmoethology, the first publication focused specifically, for the specialty Cosmoethology; and Karla Ulman's book Democracy: Experiments in the Cognópolis Suburb - Foz,

Monica Hermann Caggiano, Felipe Chiarello, Alessandro Hirata and Dr. Eliana Neme, USP / Mackenzie teachers

stemming from a master's degree research conducted at the ICCC and AMAC organizations (see page 3).

The Symposium featured 13 speakers, 11 articles published in the journal, a mentalsomatic circle on the subject, and, in the pre-event week, debate of verbetes by Cosmoethos volunteers and Symposium speakers. The Cosmoethos team evaluated that this first Symposium helped clarify the concept of democracy, making it possible to broaden its theoretical conception with a view to detailing the aspects that intertwine the regime of democratic government and Cosmoethics aiming to increasingly qualify its exercise, focusing on the installation of the Cosmoethical World State in the future.

Team of volunteers working at the Symposium

### Main Symposium Topics

- Democracy in face of social networks.
- The 30th anniversary of the Brazilian Constitution that reopened the country to democracy, ensuring the peaceful transition from dictatorship to the democratic rule of law.
- History of democracy and critical analysis of the regime aiming to broaden its understanding according to the consciential paradigm.
- Analysis of power types from Weber and Foucault and comparison to consciential power.
- Possibilities for improvement in the use of power and people management in conscientiocentric institutions.
- Essentiality of mature and cosmic free will as the main pillar for cosmoethical liberocracy, intermediate stage between democracy and cosmoethical democracy.
- Potentiating conditions of cosmoethical actions inherent to the improvement of penta and the fundamental synergism with democracy.

# Policons Project becomes reality in São Paulo

 Rogério Lopez  Policons SP

It was announced in São Paulo the implementation of an initiative that has been managed for many years: Policons (SP) - Conscientiocentric Polyspace.

Under the materthoisene of freedom - especially the freedom of choice of the assisted - Policons aims at the expansion of conscientiology. It will be a welcoming space for the assisted and to any IC, as it is open to all of them.

In practice, it works like this: all conscientiology specialties have potential interested people; Not all may be present in all locations (and some are only in Foz). The idea is for the CIs to have an agenda and location available for their courses. And, consequently, the demands of all assisted people, in all places, over time are met.

The project, which began in early 2015, was unanimously approved at a CI board meeting in May 2015, and is supported by a number of CIs, including the College of Conscientiology.

We opted for a statute model in which 3 CIs are joint associates, in the case of São Paulo are Ectolab, Apex and Reaprendentia, consequently, they are super-

visors of the work.

Policons SP already has registration and CNPJ. The next step will be the feasibility of an adequate physical space, which is already being prospected. Since it is not a CI, therefore, it has neither courses nor volunteers. In this model, courses and volunteers always come from Conscientiology CIs. Even the Policons Management Group can, by statute, only be formed by volunteers of CIs, apart from the supervision of the associated members. Its bylaws were prepared in conjunction with some CIs and were fol-

lowed, supervised and oriented by Unicin and Ciajuc. The next step will be the consideration of the final version of the by-laws by the CI Council.

In legal terms, Policons is a non-profit association (bylaws clause) maintaining its principles, guidelines and ideals, which have been widely discussed since the year of 2015.

Among them, it is worth highlighting important concepts of the consciential paradigm that always guided the project: The Group Maxiproexis, Interassistiantiality, Universalism and Cosmoethics.

## Former French actress does self-research at Cognopolis

 Nerti Vieira  Francisco Mauro

The arrival of the former Hollywood artist to Foz do Iguaçu, Kassandra Marr Barbosa, in early October, is focused on the Retropassword and Consecutive Personality courses. "I'm immersing myself in research, I'm going to the field. I will go to Scotland now and then Ireland to research another life. I am also researching Celtic and tribal heritage at group level, I have a mounted encyclopedia of over 300 tribes, which I intend to make available to the Holoteca."

In her artistic career, Kassandra has made two documentaries about Cleopatra and one about Marco Antonio and Cleopatra in Egypt, a Nikita series, a Russian spy agent, and other historical films. After returning to Brazil, she even did some articles and interviews for magazines such as Caras, but cut ties with her artistic life in 2009. In 2010, she was invited by Doctor Waldo to come to Foz because they needed a French actress. "After my meeting with doctor Waldo, I

discarded what was unfocused and I'm going to anonymity, the mentalsoma, and the research in Gramado - RS, a quiet place. I want to study the retropassword in depth.

Born in Chateaudun, a city near Paris, the actress worked with UNICEF for 12 years on the orphanage and cutting of female genitals project in Somalia and India, and the legalization of the death penalty. "When we started the project, the woman got pregnant, had her son, and if she was a girl, she left her because she was worthless. It wasn't punished, it was the custom. It took about 7 years to become the death penalty law. With the law, if the woman tries to do this, she will be punished by very severe sanctions ", explains Kassandra.

The researcher is also studying the cast of Josefina de Beauharnais, Napoleon's first wife, from when she was empress of his family, reaching approximately 400 researched personalities, with the photo, date of birth and desoma (physical death), and description of who they were, in dictionary form. There are other people interested in the project, including publishing it in English, such as the Paris National Library itself.

## Launches

# DEMOCRACY: experiments in the Cognopolis-Foz

 **Adriana Rocha**  **Cosmoethos**

Karla Ulman's book, launched on October 5th, published by Editora CRV and supported by Cosmoethos, analyzes the conceptual, theoretical bases and elements of democracy, combined with the examination of policies in Cognópolis, Foz do Iguacu - PR district. The practices of power organization of the leaders in Cognópolis are analyzed to verify the possibility of the district being a reference in participatory democracy in this century.

There are only two such researches in the academic world about democracy: prof. Robert Dahl, New Haven, USA, and Prof. Karla Ulman, Foz do Iguacu, Brazil. Three variables were analyzed in Karla's consciential gestation: "election of leaders, samples of documented political decisions in the group, and instances of direct (elective) and indirect (relevant activities) power. The results lead to the answer of the democratic types experienced in Cognópolis, and also to the sug-

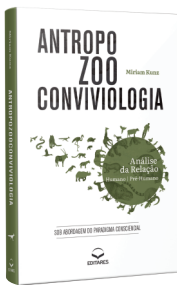

gestive question: - Who governs the Cognópolis?

## Two new books were released by Editares

 **Eliana Manfroi**  **Editares**

Book addresses relationship between humans and prehumans

Editares launched on October 12th the book Anthropozooconviviologia - Analysis of the Human / Prehuman Relationship under the Consciential Paradigm Approach, by prof. Miriam Kunz.

The aim of the work is to share the reflections and self-research of the cosmoethical or anti-cosmoethical character of the relationship between humans and prehuman animals.

The book impacts by opening up the reality of the human mentality throughout history, analyzed from the perspective of the human-prehuman relationship.

There are ways of qualifying this relationship, moving from the anti-cosmoethical indifference to the zooconviviality fraternism. The choice is up to the consciousness.

Change or Change enters 3rd Edition

In the 3rd Edition, the book Change or Change, published by Editares, focuses on assisting intermissivists suffering from social phobia (author's self-diagnosis) and consequent foreign syndrome. "I tried to give a more conscientimetric tone to the personal experiences described, taking responsibility for my mistakes and successes," says author Flávia B. Rogick.

## Conscin-Guinea pig: interassistential partnership

 **Nerli Vieira**  **Valesca Ferreira**

Throughout Saturday, October 5th, the International Association of Interassistential Conscientimetry held, in partnership with CI Tenepes, the Interassistential Guinea-pig course for 6 volunteers of the institution, attended by 4 teachers of this CI.

The objective of the partnership was to increase group synergy and interassistentiality through the deepening of conscientimetric self-research, highlighting blind or obscure points (strongtraits, weaktraits or lacking traits) in the exer-

cise of cosmoethical conviviality.

Feedback from participants highlighted the welcoming, integration, depth, transparency and authenticity of teachers to assist them in their evolutionary self-diagnoses. "Conscius appreciates the opportunity for mutual learning and mutual assistance and is available for future partnerships with all ICCC member CIs," said Prof. Ricardo Correa.

## Encyclopedia Reaches Historical Mark of 5,000 Verbetes

 **Adriane Correa**  **Keiko Asaoka**

On October 13th, more than 160 Tertulians attended the Tertularium to honor the defense of the 5,000th verbete in the Encyclopedia of Conscientiology. Verbetographer Dulce Daou brought up the theme Self-verbete, from the Self-evolutiology specialty, with the idea of each person writing a verbete referenced by the anthroponym of the verbetographer himself, being a graphothosenic expression of personal conscientiological information. Dulce commented that one of the extra-physical inspirations for the verbete occurred during the Parapsychic Dynamics of Reurbanological Encyclopedism, on the eve of the Second Enciclopedists Meeting.

Among the 5000 verbetes already defended, in 2019 were written by the neoscience proponent, prof. Waldo Vieira, co-authored with over 760 volunteer verbetographers. Today (October / 2019), the Encyclopedia of Conscientiology is in its 9th edition, with 27 volumes and 612 specialties.

## HAPPENING

📺 Cognópolis TV debuted, on October 5, 2019, the Graphocons Program, in the form of an interview with Conscientiology authors. Presented by journalist Jair Rangel, the idea is for this program to be long-lasting so that the largest number of authors will be interviewed. "Five authors have already been interviewed, and the main objective is to present to the public, both lay people and those who are aware of conscientiology, the conscientiological works in a deeper way", explains the Cognópolis TV coordinator, Emanuel Maia.

📌 The staff of the International Association of Pentology has been working hard to organize the 15th Penta Forum. On December 13th, 2019, Friday night, there will be a free opening lecture on Advanced Penta and Offiex with Hernande Leite, followed by a celebration cocktail. Volunteers and penta practitioners can reserve an agenda to participate in the activities of the IV Pentology Week, beginning on December 6th, which will include presentation of verbetes, mental-somatic circle, mini-lectures and several courses.

📌 The 3rd Ectolab Volunteer Meeting took place in Chapecó / SC from September 27th to 29th, with the presence of coordinators Myrian Sanches and Rinaldo Nishimura. The program included various parapsychic activities,

presentation of CIs, volunteers from other locations, 2020 programming and the Parasurgery Dynamics, which is open to the public. The meetings take place annually, interspersing Foz do Iguacu with other cities. "This 3rd Volunteer Meeting was a great opportunity for us to equalize Ectolab's information and recall the group existential programming we developed during the Intermissive Course," said coordinator Myrian.

## Volunteers've welcome students of Young Track Project

📷 Nerli Vieira   📸 Fernanda Fedrigo

The Tourism & Customer Service and Trade & Customer Service groups of the Young Track Iguassu project visited Ceaec on September 26th as part of the formation of the project that is in its 11th edition in Foz do Iguacu. The students were welcomed by Ceaec volunteers who led them through the main Campus spaces. Assinvéxis volunteer Pedro Borges spoke about life and career planning as

an instrument of transformation - content that is part of the formation of young people and permeates all areas of human development, providing greater self-esteem.

### STAFF

**Coordination:** Nerli Vieira e Gelson de Oliveira  
**Journalist in charge:** Amaury Pontieri - MTB nº 23.154/SP  
**Writing:** Adriana Rocha, Adriane Correa, Eliana Manfro, Nerli Vieira e Rogério Lopez  
**Collaboration:** Daniel Ronque, Fernanda Fedrigo, Francisco Mauro, Gelaine Baratto, Keiko Asaoka e Valesca Ferreira  
**Revision:** Julieta Mendonça  
**Layout:** Matheus Nogueira
